

LOT SPLIT (or MINOR SUBDIVISION) (Sec. 1222.02)

A lot split (or minor subdivision of land) is defined as the division of parcels less than five (5) acres in size which do not involve the opening, widening or extension of any street or road, or easement of access, and does not involve more than five (5) lots, including the remainder of the original tract (Ohio Revised Code, Section 711.131).

The application to split a lot must include the following:

- A survey with legal description (prepared and stamped by a professional surveyor in the State of Ohio) delineating the dimensions of the proposed parcel including the remainder of the original tract. The survey should include the dimension and location of proposed lot lines and property corners (by pins, corner posts, other monuments), as well as existing structures, easements, public facilities, direction of drainage and rights-of-way. The survey should also reflect the 100-yr flood plain boundary and floodway, if existing. All lots must face a public street.
- Submit a General Warranty (or Quit Claim) Deed that includes the legal description of the parcel. If you are selling both parcels (i.e. -- original tract and the split) you will need a deed for each. Ensure that the legal description in the deed has exactly the same bearings reflected in the survey map.
- Before submitting to the Department of Community Development, have the survey map and deed reviewed and stamped by the Tax Map Office of the Allen County Engineer's Office for compliance with the *Standards Governing Conveyances of Real Property in Allen County, Ohio*.
- The fee is \$35 per split, payable to the City of Lima Treasurer.
- The Planning Staff can approve lot splits (and consolidation) if the dimensions of the splits will meet the minimum code requirements for the district in which the proposed split is located. All lots must have a minimum 50-foot wide public street frontage and meet minimum area requirements (e.g., 4,800 ft² for an interior lot in a Class I Residential District), provided that existing conditions on both parcels comply with all applicable zoning requirements. If either the front or depth falls short of the required minimum, the split can still be considered by the City Planning Commission provided that the area of the lots resulting from the split meet the minimum area requirements, are buildable, and would not require variances on setback requirements. Any lot split request resulting in lots that would measure less than the minimum area requirement would need a variance which requires an additional application, fee, and justification for the split.

For further details, call the Planning Division of the Department of Community Development at (419) 221-5146.
