

LOT SPLIT (or MINOR SUBDIVISION)

(Sec. 1222.02)

A lot split (or minor division of land) is defined as the division of parcels less than five (5) acres in size which do not involve the opening, widening or extension of any street or road, or easement of access, and does not involve more than five (5) lots, including the remainder of the original tract (Ohio Revised Code, Section 711.131) .

Applicants for a lot split are strongly encouraged to meet with the Planning Staff of the [Dept. of Community Development](#) prior to submitting an intent to subdivide (there is nor application form for this intent). The purpose of this meeting is to discuss early and informally the purpose and effect of the [subdivision regulations](#) and to familiarize the applicant with applicable [zoning](#) regulations, floodplain regulations, and soil drainage and sewage issues within the city. The intent to split a lot must include a survey and a legal description and a deed for proposed minor land division,:

- Submit a survey with legal description (prepared by a prof. surveyor in the State of Ohio) delineating the dimensions of the proposed parcel including the remainder of the original tract. The survey should include the dimension and location of proposed lot lines and property corners (by pins, corner posts, other monuments). Include therein existing structures, easements, public facilities, direction of drainage and ROW. Survey should also reflect the 100-yr flood plain boundary and floodway, if existing. All lots should face a public street.
- Submit a General Warranty Deed that includes, among other things, the legal description of the parcel. If you are selling both parcels (ie -- original tract and the split), you would need a deed for each. Make sure that the legal description in the deed has exactly the same bearings reflected in the survey map.
- Before submitting to [DCD](#), have the survey map and deed reviewed and stamped by the Tax Map Office of Allen County Engineer's Office for compliance with the Standards Governing Conveyances of Real Property in Allen County, Ohio.
- The fee is \$25 per split, payable to the City of Lima Treasurer.
- The Planning Staff can approve lot splits/consolidation if the dimensions of the splits will have a minimum of 50 feet in front and 96 feet deep (4,800 ft²). If either the front or depth falls short of the required minimum, the split can still be approved (by [City Planning Commission](#)) -- provided the lots resulting from the split measure at least 4,800 ft²; are buildable; and would not require variances on setback requirements. Anything less than 4,800 ft² would need a variance from the CPC. In which case, you will have to justify the split.

For further details, call the Planning Division of Department of Community Development at (419) 221-5146.
